Top Skills

Django

Master Java, Spring 6 and Spring Boot 3, Spring JPA, Security, Spring AI, Docker and Microservices

Full Stack Development, TypeScript with ReactJS, ShadcnUI, Node.js, Express and MongoDB

Languages

English (Full Professional)

Telugu (Native or Bilingual)

Kodandarao Chellapilli

Software Engineer at Renewable Innovations | Aspiring Machine Learning, LLMs & Data Science Specialist
Lindon, Utah, United States

Summary

About Me

I'm Vinny Chellapilli, a software engineer who loves solving problems with code, data, and AI. My journey has combined building real-world projects and teaching others, which has strengthened both my technical expertise and my ability to explain complex ideas simply.

I have worked across the stack—from creating interactive front-end applications in React to developing back-end systems in Python and Java. My passion for machine learning led me to build projects like a home price prediction model, and I've also taught students about machine learning algorithms, helping them understand how data can create real value.

What I'm good at:

Languages & Tools: Python, Java, JavaScript, React.js

Focus Areas: Full-Stack Development, Data Engineering, AI/ML

Math & Logic: Statistics, Linear Algebra, Algorithms, Data Visualization

Beyond coding, I enjoy learning new technologies, sharing knowledge, and working on ideas that make life better. I believe in hard work, kindness, and curiosity as the foundation for growth.

Experience

Renewable Innovations Inc

Software Engineer

December 2023 - Present (2 years 7 months)

Lindon, Utah, United States

Refactored and modularized the entire codebase, significantly improving maintainability and enabling faster feature development.

Built and deployed full-stack applications with React (frontend) and Spring Boot (backend), reducing page load time by 40%.

Designed and implemented scalable REST APIs, optimizing backend logic to improve performance and successfully support 200+ internal users.

Brigham Young University–Hawaii

2 years 2 months

Teacher Assistant

April 2023 - July 2024 (1 year 4 months)

Laie, Hawaii, United States

- Providing instruction for more than 200 students each week with the understanding of general concepts
- Assisting the professor with daily tasks including re-examining the assignments
- Teaching students how to solve the object-oriented programming concepts

Web Designer

January 2023 - July 2024 (1 year 7 months)

- Developing the efficient web applications using the Bright Spot low-code platform
- Utilize programming languages such as HTML and CSS JavaScript to extend the functionality of Bright spot and Docket Manager applications
- Solved the broken links and fixed websites through Debugging

IT Technician

June 2022 - January 2023 (8 months)

- Aided professors to fix the Canvas learning platform as well as school class catalogs
- Trained faculty and students with university teaching platform usage
- Organized and hosted weekly meetings with the manager to report the progress of the work plan

Sun Institute of agricultural Sciences
Mathematics Teacher
October 2017 - February 2019 (1 year 5 months)
Taught calculus and statistics to 400+ students

Education

Brigham Young University - Hawaii
Bachelor of Science - BS, Computer Science · (2019 - 2023)

Andhara University
Bachelor's degree, Computational and Applied Mathematics · (June 2012 - June 2015)
